

As a citizen and private homeowner, I feel that I have the right to determine who can call my home. I will continue to support the charities and organizations that I choose as well as maintain communication with these organizations. I do not need to be contacted by organizations with whom I have no knowledge especially when they are interrupting my life and soliciting for funds that may or may not be reasonably allocated to the groups with whom they propose to be supporting. This is my right to privacy which supersedes the needs of industries based on telemarketing. If the philosophy of this presidency is reduced federal intervention at the state level, let the states and their constituents make the determination of what guidelines they deem most appropriate. Thank you and I trust you will listen to the individual rather than the businesses that appear to rule. Thank you.

Janet Porcelli
